

ANITA IFEOMA IKEDIASHI

Full-Stack Web Developer | React, Next.js, Frontend Architecture | High-Traffic Websites

Lagos, Nigeria (Remote) | anitaikediashi83@gmail.com | +234 810 040 6393 | [linkedin.com/in/anita-ikediashi-a61668188](https://www.linkedin.com/in/anita-ikediashi-a61668188) | github.com/AnitaIkediashi

PROFESSIONAL SUMMARY

Full-stack web developer with 3+ years of hands-on experience building and maintaining production websites serving 100+ concurrent users. Specialized in React and Next.js for high-performance frontend development, with practical experience in website hosting, domain management, and server-side rendering for SEO-critical applications. Proven track record of independently managing multiple web projects from development through deployment and ongoing maintenance. Strong problem-solver comfortable with both frontend architecture and backend integration, site optimization, and keeping websites running reliably in production.

CORE SKILLS

Languages & Databases: TypeScript, JavaScript, SQL, T-SQL, Python (Basic), PostgreSQL, Relational Database Design, Data Modeling, Query Optimization

Backend & Infrastructure: REST APIs, Server-Side Rendering (SSR), API Integration, Database Management, Authentication (JWT)

Frontend: React, Next.js, Vue.js, HTML5, CSS3, Tailwind CSS, Responsive UI Development

Performance & SEO: Page Load Optimization, SEO-friendly Architecture, Caching Strategies, Core Web Vitals

Website Management: Site Maintenance, Performance Optimization, DNS & Domain Management, Hosting Configuration

Website Troubleshooting: Debugging, Performance Issues, Server Configuration, Security, Uptime Management

PROFESSIONAL EXPERIENCE

Full-Stack Engineer — Huawei

Jan 2023 – Present | Contract

- Provided technical support and troubleshooting for internal platforms and backend services, resolving 50+ support incidents monthly and helping maintain 99%+ platform availability for business-critical applications.
- Built and deployed a full-stack HR Management System (HRMS) with frontend dashboards, backend services, and SQL-backed approval workflows, supporting 100+ employees on a single platform.
- Architected a real-time shift management dashboard that consolidated data from multiple operational sources, reducing manager scheduling effort by 40% and improving attendance-tracking accuracy.
- Engineered real-time monitoring and alerting tools in JavaScript that automated anomaly detection and streamed live notifications, reducing incident response times by 60%.
- Developed and maintained reusable frontend components and backend integration modules, accelerating feature delivery by 30% and reducing duplicate development effort across projects.
- Established internal coding standards and mentored 3+ junior engineers, and served as the primary technical escalation point for cross-functional teams while maintaining SLA compliance.

Technologies: Vue.js, JavaScript, Tailwind CSS, Element Plus UI, SQL, MySQL, T-SQL, Huawei Cloud

Web Developer & Project Owner — Freelance

Mar 2022 – Present | Remote

- Worked independently to scope projects, manage timelines, and deliver quality websites without supervision.
- Independently built and launched 5+ production websites, managing full project lifecycle from requirements through deployment and post-launch support.
- Developed a property listing platform using Next.js with Server-Side Rendering; improved page load time by 40% and lifted SEO visibility significantly.
- Built a flight and hotel booking website with React frontend, JWT authentication, and live API integration with payment processing.
- Managed website hosting and domain configurations using GoDaddy and cPanel; configured DNS records, SSL certificates, and server settings.

Technologies: Next.js, React, TypeScript, REST APIs, GoDaddy, Cloudflare, DNS Management, SSL Configuration, Performance Optimization

PROJECTS

HR Management System (HRMS) Dashboard — Vue.js, Tailwind CSS, Huawei Cloud

- Delivered a web-based HR dashboard automating employee record management and approval workflows, improving HR operational efficiency through reusable, role-based interfaces.

Flight & Hotel Booking Application — React, Next.js, JWT, REST APIs, PostgreSQL, Prisma ORM, Stripe

- Built a full-stack booking platform with JWT authentication, RESTful API integrations, and Stripe-powered payments, supporting real-time availability and transaction management.

Talent Acquisition Platform — React, TypeScript, Google Sheets API

- Developed a systematized job application platform that stores candidate submissions and triggers instant HR notifications, reducing manual data entry through Google Sheets API and email automation.

EDUCATION

Bachelor of Engineering (BEng), Civil Engineering

University of Benin | 2015 – 2019
